

Daily Scrum Meeting Minutes:

Attendees: Zainab Akhtar, Michael Alvarez, Javier Espinosa, Joseph Avalos

Start time: 6:00 PM

End time: 6:25 PM

Zainab Akhtar:

- How many hours did I work since the last meeting?
 - 1 hour
- What was done since the last scrum meeting?
 - Added the initial considerations for security such as where authorization, authentication, and encryption data flow will occur. Started to create a very basic legal for the architecture diagram to provide clarity as well as started labeling the responsibilities for offboarding and onboarding.
- What is planned to be done until the next scrum meeting?
 - Refine security flow to improve the level of clarity especially around the identity management interactions. Continue refining the architecture diagram so it can be added in the documentation.
- What are the hurdles?
 - There is uncertainty around the authentication between endpoints and identity management systems.

Michael Alvarez:

- How many hours did I work since the last meeting?
 - 1 hour
- What was done since the last scrum meeting?
 - Reviewed the list of requirements and put them into more clear categories such as separating the offboarding with the onboarding. Started to draft a table to help structure the needed requirements for documentation.
- What is planned to be done until the next scrum meeting?
 - Share the requirements that were added with the team to gain feedback. Also figure out if there are overlapping or missing requirements.
- What are the hurdles?
 - Making sure that the different scenarios for employee types are captured.

Javier Espinosa:

- How many hours did I work since the last meeting?
 - 1 hour
- What was done since the last scrum meeting?
 - Presented the research that was conducted about identity management and access control tools to my group and received feedback. From that I narrowed the list to contain only the best tools that would fit the scope of the project.
- What is planned to be done until the next scrum meeting?
 - Collaborate with the group to finalize one main tool and align it to the system architecture.

- What are the hurdles?
 - Balancing the simpleness of the feature with completeness so it doesn't go above the project's scope.

Joseph Avalos:

- How many hours did I work since the last meeting?
 - 1 hour
- What was done since the last scrum meeting?
 - Refined the documentation so it aligns with the architecture better. Added in notes that link some components of the diagram to the chosen documentation section.
- What is planned to be done until the next scrum meeting?
 - Started to draft some content for the configuration sections and admin procedures when the technological tools are finalized,
- What are the hurdles?
 - Having to wait on the other team for confirmation of tools and architecture to finish my part.
