

Daily Scrum Meeting Minutes:

Attendees: Zainab Akhtar, Michael Alvarez, Javier Espinosa, Joseph Avalos, Bryan Rivero

Start time: 6:00 PM

End time: 6:35 PM

Zainab Akhtar:

- How many hours did I work since the last meeting?
 - 1.5 hour
- What was done day since the last scrum meeting?
 - Started to draft the initial plan of the user access lifecycle by researching the key stages of how the user interacts with the system such as the permission, authentication, account creation and user removal.
- What is planned to be done until the next scrum meeting?
 - Continue to refine the lifecycle and start to define how the permissions controls apply in specific areas of authentication.
- What are the hurdles?
 - Making sure the RBAC structure matches and goes with the lifecycle model.

Michael Alvarez:

- How many hours did I work since the last meeting?
 - 1.5 hour
- What was done since the last scrum meeting?
 - Started to create the initial draft of the incident response workflow by looking at different stages such as the reporting, detection, resolution and containment.
- What is planned to be done until the next scrum meeting?
 - Continue to further refine the workflow and draw out how the monitoring tools and system logs would trigger the incident response process.
- What are the hurdles?
 - Making sure the final workflow is clear.

Javier Espinosa:

- How many hours did I work since the last meeting?
 - 1.5 hour
- What was done since the last scrum meeting?
 - Started to draft the security policy framework by drawing out the key areas like operational security procedures, system usage guidelines, and administrative access.
- What is planned to be done until the next scrum meeting?
 - Continue to develop the policies making sure they go with the already drawn out system architecture and security controls.
- What are the hurdles?
 - Making the policies in a way that is easy to understand.

Joseph Avalos:

- How many hours did I work since the last meeting?
 - 1.5 hour
- What was done since the last scrum meeting?
 - Started to create the security monitoring framework by talking about the types of system activities and how they should be monitored in case of an attack.
- What is planned to be done until the next scrum meeting?
 - Continue to refine the monitoring procedures and start to match them with the workflow of the incident response.
- What are the hurdles?
 - Ensuring the framework matches the realistic security monitoring practices.

Bryan Rivero:

- How many hours did I work since the last meeting?
 - 1.5 hour
- What was done since the last scrum meeting?
 - Began organizing the package of documentation by adding in the outlined content and making sure they go with one another.
- What is planned to be done until the next scrum meeting?
 - Continue to organize and find the documentation that needs to be added into the package and also start to outline the security implementation overview areas.
- What are the hurdles?
 - Looking through all the documentation can often be very confusing.
