

Daily Scrum Meeting Minutes:

Attendees: Zainab Akhtar, Michael Alvarez, Javier Espinosa, Joseph Avalos

Start time: 6:00 PM

End time: 6:35 PM

Zainab Akhtar:

- How many hours did I work since the last meeting?
 - 1.5 hours
- What was done since the last scrum meeting?
 - Continued to refine the high-level architecture layout and added more details on interactions such as those between access control, data flow, identity management and endpoint provisioning. Also started to decide which of the components will handle the onboarding and offboarding tasks..
- What is planned to be done until the next scrum meeting?
 - Identify and incorporate the security consideration for each module such as encryption flow and authentication. Begin to create a simple key legend for the diagram in order to help clarity.
- What are the hurdles?
 - Clarity is needed on the way the identity management system will communicate with the legacy endpoints.

Michael Alvarez:

- How many hours did I work since the last meeting?
 - 1 hour
- What was done since the last scrum meeting?
 - Continued to define the system requirements emphasizing focus on role-based scenarios and the offboarding and onboarding system. Identified a list of the required fields for employee accounts.
- What is planned to be done until the next scrum meeting?
 - Review the list of requirements with the group and gain feedback. Also start organizing them in a table format to stay organized with documentation.
- What are the hurdles?
 - Making sure that the different scenarios for employee types are captured.

Javier Espinosa:

- How many hours did I work since the last meeting?
 - 1.5 hour
- What was done since the last scrum meeting?
 - Researched and compared multiple access control and identity management tools. Listed out several pros and cons of each tool in a reference table.
- What is planned to be done until the next scrum meeting?
 - Present the listed tools to the group and discuss which one to finalize and include in the documentation.

- What are the hurdles?
 - Determining which tool would work best and not overcomplicate things.

Joseph Avalos:

- How many hours did I work since the last meeting?
 - 1 hour
- What was done since the last scrum meeting?
 - Expanded the documentations structure by adding placeholders for configuration, admin procedures, and deployment. Also added bullet points and tables for each planned section.
- What is planned to be done until the next scrum meeting?
 - Add in more details under admin procedures and configuration once the group finalizes on the section for technology. In addition I would like to start linking the specific system modules in the architecture diagram to the correct documentation.
- What are the hurdles?
 - Having to wait on the other team members to finalize their sections in order to organize my documentations.
